

**Annex A – Specifications**

| Item | Picture                                                                                                                                                       | Specifications                                                                                                                                                                                                                                                                                                                                                          | Remarks (to be filled by Tender) |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|
| 1    |  <p><b>NAME:</b> Outer-cover Size 14.00 R20<br/><b>Quantity :</b> 100 ea</p> | <p><b>SIZE:</b> 14.00 R20 (FITS 20-INCH RIM)</p> <p><b>SPECIFICATION:</b> Heavy-duty, all-steel radial tyre, high cut resistance, high load-carrying capacity, brand: Sportrak or equivalent.</p> <p><b>TREAD PATTERN:</b><br/>All terrain, on-road and off-road.</p> <p><b>APPLICATION:</b><br/>To be used on 4-Ton trucks.</p>                                        |                                  |
| 2    |  <p><b>NAME:</b> Inner Tube<br/><b>Quantity :</b> 100 ea</p>               | <p><b>SIZE:</b> 14.00 R20.</p> <p><b>SPECIFICATION:</b> Heavy-duty rubber inner tube suitable for 14.00 R20 Tyre. High air retention and durability for heavy-load applications. Complete with long L-shaped metal valve stem (TR177A or equivalent).</p> <p><b>APPLICATION:</b> To be used with 14.00 R 20 Tube-type tyres and inner-tubes fitted on 4-Ton trucks.</p> |                                  |
| 3    |  <p><b>NAME:</b> Flap Cover<br/><b>Quantity :</b> 100 ea</p>               | <p><b>SIZE:</b> 14.00 R20.</p> <p><b>SPECIFICATION:</b><br/>Heavy-duty rubber type flap suitable for 14.00 R20 Tube-type tyres. Designed to provide protection between the inner tube and wheel rim. Resistant to abrasion, heat and ageing.</p> <p><b>APPLICATION:</b> To be used with 14.00 R 20 Tube-type tyres and inner-tubes fitted on 4-Ton trucks.</p>          |                                  |
