PORTABLE LIVE STREAM DEVICES SYSTEM SPECIFICATION

Mobile live streaming requires a different setup than what you'd need for streaming from the studio. To point out that it is possible to live stream from anywhere with high-quality camera connected to an encoder. The use of hardware encoders to enhance of live video contribution over bonded unmanaged IP networks, such networks being used are 3G/4G/5G, Wi-Fi, satellite and public internet.

This device can connect to any Drone controller and instantly share its display. For example, a group of soldiers on the ground flying their drones for an operation that provides in the air surveillance can connect to a live streaming encoder. Then that is specifically having a secure connection to a local server that can host the live video. Then the video from the server can be shared to invited viewers who are connected to a network.
